What I don't offer

- I do not offer general computer skills training (other than those skills needed to use a computer with image editing software).
- I am not able to repair or upgrade computers. However, if repairs or upgrades are needed, or particular computer skills training are required, I can usually put you in touch with an appropriate trainer or computer upgrade and repair service.

What are the extras?

- As the costs of learning in your own home are your own, no other costs apply, (the same applies for business clients trained in their own office etc.)
- In the event of training taking place away from your home then other costs may apply to cover incidentals e.g. cost of materials.
- Locations beyond a 5-mile radius of Exmouth, Devon will incur an additional charge for travel.
- Additional costs for accompanied photo-shoots e.g. travel, entrance fees for yourself and myself, are paid by you as appropriate.
- A modest consultancy fee may apply to accompanied shopping for the purchase of equipment, for example a digital camera, computer, printer, and camera accessories.

Where does the training take place?

- Normally in your own home, but this will depend on your home having a suitable work area and those involved, as appropriate, would need to bring their own digital cameras and laptop computers etc. However, if preferred, I can supply up to two loan laptops for use during a lesson.
- I am based in Exmouth, Devon. Being a beautiful and popular part of the country, I have had people travel to me to combine some training with a stay with relatives etc., having some training whilst on holiday or accompanied photo-shoots are other options.
- Other locations may be negotiable.
- Locations for photo-shoots can be negotiated to meet particular needs.

Are there any travel costs?

- Not for training locations within a 5-mile radius of Exmouth, Devon. Further distances are negotiable, but will incur a charge for travel.
